

**PART 1 :**  
 Identify LOW, MEDIUM & HIGH electricity demands at the different times of the day to calculate the electricity score for these hours.

TIME OF DAY	INTENSITY OF THE ELECTRICITY DEMAND			TOTAL POINTS
	LOWER (0 < 800 Watts)	MEDIUM (800 < 1,400 Watts)	HIGHER (1,400+ Watts)	
12:00AM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
4:00AM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
8:00AM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
10:00AM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
2:00PM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
6:00PM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
8:00PM	x 1 pt <input type="text"/>	x 2 pts <input type="text"/>	x 3 pts <input type="text"/>	<input type="text"/>
